About Me

I am a Software Engineer with 4 years of professional experience primarily in enterprise application development. I live in north-eastern Wisconsin with my wife and two kids. I enjoy gardening, carpentry and video game development in my spare time. I'm passionate about large-scale data storage, application portability and the effects of AI on the software engineering landscape.

Professional Experience

Web Application Developer

Verisk, Lehi UT, Aug 2022 – Present

- Re-launched an existing codebase for a new market. Deployment included significant AWS work.
- Developed website features that would integrate with an Android video-collaboration application.
- Angular, Typescript, Java, Postgres, MongoDB, SQS, SNS, S3, Snowflake, Splunk
- Helped scale the starting team of three developers to an international team of 20+ including contractors. Helped interview candidates and make hiring decisions.

Completing Bachelors Degree

UVU, Orem UT, May 2021 - August 2022

Software Engineer II

ABGRM, Murray UT, Oct 2019 – May 2021

- Maintained and developed a cross-platform mobile application using Ionic and Angular.
- Maintained and refactored large quantities of undocumented code. Reading and understanding code with little or no frame of reference.
- Android, Javascript CSS, HTML, NPM, Angular, Python, PHP, Docker, Ubuntu, SAML
- Built a Python task scheduler to execute re-balance trades by connecting to an oracle database, assembling an XML instruction string, and calling a system executable.

Misc. Consulting

- Built and deployed a mobile game to the Google Play store to get a feel for Google ad campaigns.
- Collaborated with two other devs on a Flutter / Android app for a startup company that sold automotive information videos to mechanic shops.
